

Dryflow

Infinity

Dryflow **Infinity**

Benefiting from **25 years** of Dryflows hand drying experience, the Infinity is a hand dryer way ahead of the competition.

5 years of extensive research and development, conducted hand in hand with building owners, installers and consumers, have led to the creation of a stylish hand dryer that beats anything else on the market.

Welcome to the future of hand drying.

Featuring an **Aeroflex** curved drying system, the Infinity finds the perfect balance between speed and sound output. Its **DX3 RAPID-speed** digital brushless motor spins at an impressive 65,000 rpm, propelling a turbocharged air speed of 555km/h - ranking The Infinity one of the fastest dryers available.

At less than 10cm in depth, its ultra-slimline design fits perfectly into any washroom.

Hygiene takes centre stage with the Infinity's unique double-filtered HEPA filter air cleaning system, **capturing 99.5%** of bacteria-sized particles from the air.

The Dryflow Infinity also comes with the **Connect+** plug-in system, making it a breeze to install, maintain, and service.

The Infinity adjustable heat switch keeps the air warm in winter, turn it off in summer for eco mode- highly energy efficient at just 700 watts.
